SUMMARY

Crimes Reported

- In 1982, serious crime decreased 7.2 percent in number of offenses and by 7.0 percent in terms of rate per 100,000 population. It should be mentioned that Oregon's serious crime rate in 1981 has been the highest recorded during the past ten years. Index crime (the nationally standardized measure of serious crime) consists of murder, rape, robbery, aggravated assault, burglary, larceny, motor vehicle theft and arson.

- Index crime comprised 50.6 percent of all reported offenses in 1982.

- Part II crime (less serious offenses) decreased 2 percent in total numbers reported and by 1.6 percent in terms of rate per 100,000 population.

- Multnomah County had the highest rates of violent, property, and total Index crime in the state. Marion County had the second highest property (and total Index) and third highest violent crime rate. Lincoln County ranked second in the state in violent crime rate.

Arrests

- Arrests for Index crimes increased by 1.2 percent over 1981. This was due to a substantial increase (6.1%) in arrests of adults for Index crimes. Arrests of juveniles decreased in both categories: 6.7 percent for Index crimes and 4.1 percent for Part II crimes.

- Arrests for all offenses decreased by 1.7 percent in 1982.

- Juveniles accounted for 35 percent of the arrests for Index crimes in 1982.

- The number of juveniles arrested for Index offenses has declined each year since 1979.

Clearances

- The clearance rate for the total Index crimes was 21.1 percent in 1982. The violent crime clearance rate was 44.1 percent while the clearance rate was 19.3 percent for the property crimes.

A table of crime statistics follows this Summary.

Highlights of the report are as follows:

Murder: Over the past six years the crime rate for murder has fluctuated year by year, i.e., up one year and down the next. It was up in 1980, down in 1981, and increased in 1982. This fluctuation in rate is due in part to the relatively small number of murders committed and, therefore, the ease with which the rate can be affected.

Rape: The rate and number of offenses reported for rape decreased approximately five percent in 1982.

Robbery: In 1982 the rate and number of robbery offenses decreased over seven percent. This follows very large increases in robbery the previous two years; 18.7 percent and 15.4 percent in 1981 and 1980, respectively.

Aggravated Assault: Aggravated assault is the only Index offense (with a sizeable number) to show an increase in 1982 from 1981 figures. The rate and number of offenses increased nearly four percent.

Burglary: A sizeable decrease of reported burglaries occurred in 1982. The number of residential burglaries decreased 11.7 percent and nonresidential (commercial) burglaries decreased 6.2 percent. The burglary rate had been increasing the previous three years.

Larceny: Larceny (theft) accounts for 60 percent of the Index offenses. The larceny rate decreased 6.1 percent from 1981 figures, after having experienced increases the previous five years.

Motor Vehicle Theft: Motor vehicle thefts decreased again in 1982, as it has the previous four years. The number of offenses decreased 12.1 percent from 1981's figures.

Arson: The arson rate decreased three percent from 1981's figures. The crime of arson was added as an Index crime in 1979.

Part II Crimes: Part II crimes as a total group showed a two percent decrease from 1981. Part II crimes that reflected sizeable rate increases in 1982 were:

forgery/counterfeiting +18.0%

offenses against the family +23.0%

prostitution +29.0%

sex offenses +13.2%.

Arrests for DUII decreased 8.2 percent from 1981 figures.

OVERVIEW OF OREGON CRIME REPORTING AND CRIMINAL JUSTICE SYSTEM

INTRODUCTION

This is the ninth annual report of criminal offenses and arrests produced by the State of Oregon since the beginning of the Oregon Uniform Crime Reporting Program (OUCR). OUCR is an incident based reporting program, tailored to the needs and operational procedures of the police agencies in Oregon. (Reference to "police" includes both police and sheriff departments.)

Incident based reporting requires the recording of specific information about each criminal event known to the police. A criminal event may be reported to a police department by a victim or other source or discovered as a result of police operations. Any reported criminal incident that is determined to be unfounded through subsequent police investigation is deleted from the counts.

The Oregon Uniform Crime Reporting Program requires the reporting of all criminal offenses defined as "Part I and Part II crimes" and the reporting of all arrests for such offenses. Law enforcement agencies also report the clearance of such offenses by arrests of persons or other means. The number of persons reported as arrested includes all persons reported as physically arrested, summoned or cited by police agencies during 1982.

Reporting agencies submit the recorded data monthly to the Law Enforcement Data System either on provided forms or magnetic tape. The data is then processed by a computerized system and reports reflecting the monthly activity of each agency are produced and returned to the contributor for their use.

As agency reports are processed each month, data required for the FBI National UCR Program is extracted. When all agencies have been processed, a magnetic tape containing UCR data for all Oregon incident reporting agencies is mailed to the FBI.

In Oregon, the offense of Arson was reported as a Part II offense since January 1, 1975. By national decree (FBI standards), Arson became a Part I Index crime on January 1, 1979.

Definitions of the offenses, clearances, and arrests are included in Appendix A of this report.

REPORTING JURISDICTION

Reported offenses relate to the jurisdiction in which they occur. The arrest and clearance, in every case, is attributed to the jurisdiction in which the offense occurred, even though the arresting agency may not be the dpeartment originally reporting the offense. State Police and county sheriffs have concurrent jurisdiction in all counties of the state. Their reports generally apply to criminal offenses and arrests occurring in those areas outside incorporated cities which have municipal police departments.

DEGREE OF REPORTING

During 1982 offense and related supplementary information, including arrest data, was received from a total of 183 agencies--145 municipal and other police departments, 36 county sheriff departments, the Oregon State Police, and the Oregon Liquor Control Commission. In 1982, the number of agencies participating in the OUCR program represented service to 99 percent of the state's population.

USE OF OUCR

Only crimes known to the police are included as part of the official crime rate. Thus, under-reporting of crime can have a significant impact on crime rates and also on the evaluation of the effectiveness of crime reduction programs.

Substantial evidence is contained in reports on criminal victimization surveys which indicates that reporting rates are highly stable among most social groups and across different geographical areas. This suggests reported crime can be a good indicator of crime patterns and trends.

While it is apparent that crime information reported to the police does not provide a complete picture of the crime situation in our society, it is compiled and analyzed because of the following reasons:

a. Reported crime information is used by the police agencies for resource allocation and determining appropriate agency responses to occurrences.

b. Reported crime data, recognized as a portion of the total crime, is, in fact, a highly accurate measurement of occurrences in society that must be addressed by the criminal justice system.

c. This system is based on definitions which are standardized (uniform) across the nation and it is unlikely that it will be appreciably altered in the foreseeable future.

INTERJURISDICTIONAL COMPARISONS

Care should be taken in drawing conclusions and making decisions about problems based solely on crime and arrest data as reported by different law enforcement jurisdictions. Factors relating to crime reporting practices, law enforcement policies, population characteristics and attitudes all contribute to variation in reported data.

Some general factors which may affect the amount of crime reported and type of crime committed are:

- Density and size of the community population and the metropolitan area of which it is a part.

- Composition of the population, with reference, particularly to age.

- Economic status, education, and recreation characteristics of the community population.

- Relative stability of the population, including commuters, seasonal, and other transient types.

- Climate, including seasonal weather conditions, and other geographical variations.

- Effective strength of the police force.

- Policies of the prosecuting officials and the courts.

- Attitude of the public toward law enforcement problems.

- The administrative and investigative follow-up of the local law enforcement agency, including the degree of adherence to crime reporting standards.

SECTION 1

STATEWIDE OFFENSE AND ARREST DATA

INTRODUCTION

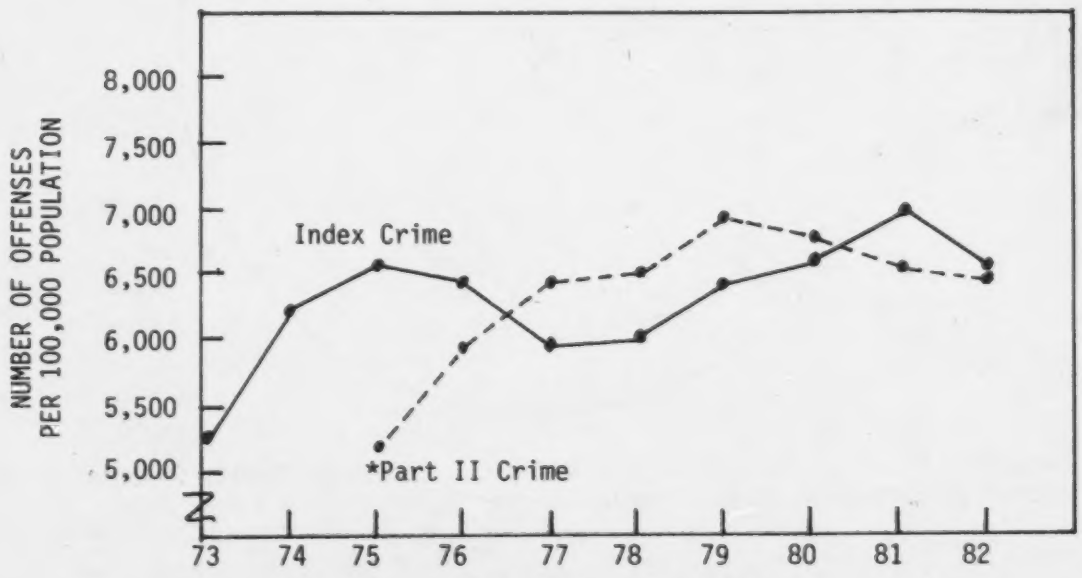
This section presents the number of criminal offenses and arrests reported by police agencies in 1982. The statistics represent the aggregate of all reporting agencies within the state, except when noted, and are arranged in the following three subsections:

1. Overview of offenses.
2. Overview of arrests.
3. Detailed information regarding Index and Part II offenses.

The statewide arrest totals in this section are not identical to those shown in Sections 2 and 3. The differences, where they exist, are small and are the result of two separate methods of compiling the data at two different time periods.

OVERVIEW OF OFFENSES

- The total crime rate in 1982 was 13,009.6 offenses reported per 100,000 population. This reflects a decrease of 4.4 percent from 1981.
- The Index crime rate (6,570.7) decreased 7.0 percent.
- The Part II crime rate (6,438.9) decreased 1.6 percent.

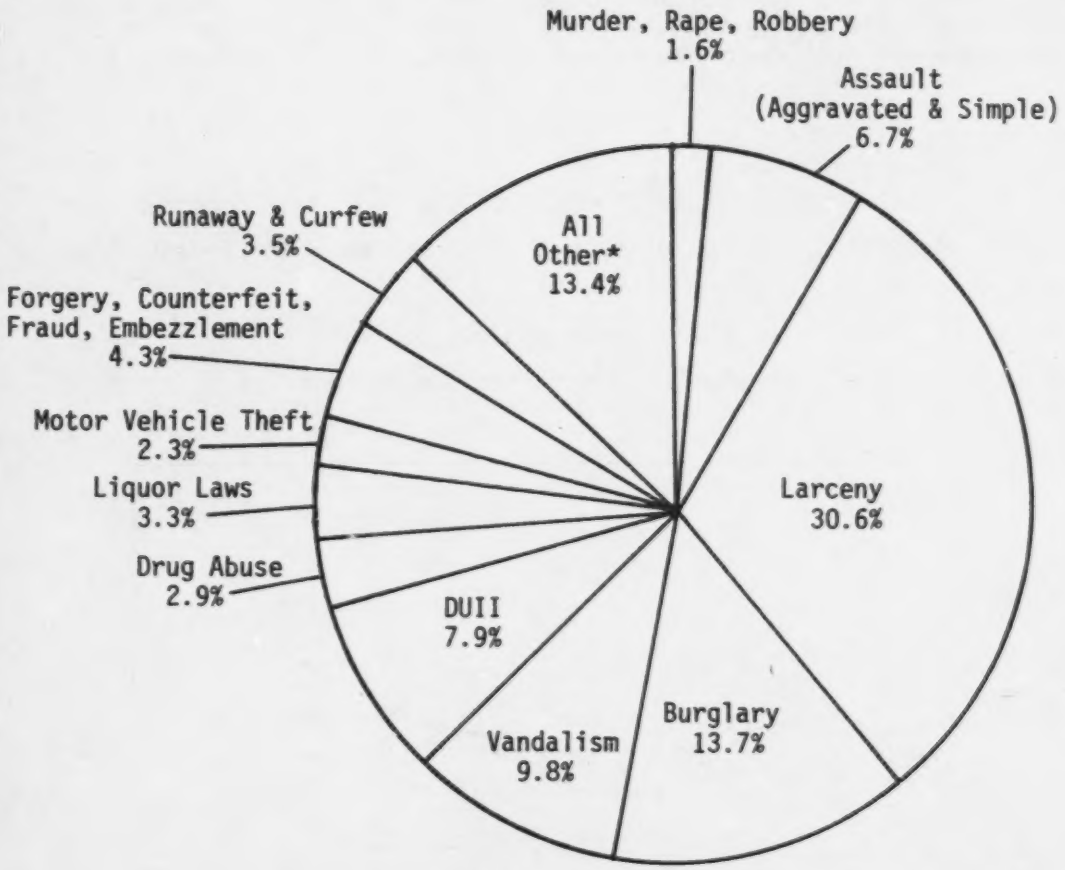


*Part II crimes not reported prior to 1975

FIGURE 1 - INDEX AND PART II CRIME RATES
1973-1982

The 1982 percentage distribution of both Index offenses and Part II (from Table 1) is depicted in the form of a pie chart in Figure 2.

- Larceny represents the largest portion of reported crime in Oregon (30.6%).
- Larceny and burglary together account for 44.3 percent of all reported crime.
- Major violent crimes (murder, rape, robbery) account for 1.6 percent.
- Assaults (aggravated and simple) account for 6.7 percent.



*Weapons, Prostitution, Other Sex Offenses, Gambling, Family Offenses Disorderly Conduct, Arson, Stolen Property

PERCENT DISTRIBUTION

- The Index crime rate (offenses per 100,000 population) was 6,570.7 per 100,000 in 1982--a decrease of 7.0 percent from 1981 (Table 3).
- Six of the eight Index offenses reflected decreases in their crime rate in 1982 from 1981 figures.

  Decreases were recorded for the categories of rape (5.5%), robbery (9.2%), burglary (9.8%), larceny/theft (6.1%), motor vehicle theft (12.0%) and arson (3.0%).
- The crime rate for aggravated assault increased 3.8 percent while the murder rate increased 18.6 percent (21 more murders were reported in 1982).
- 40,273 arrests were made in 1982 for Index crimes--80 percent of these were for the property crimes of burglary, larceny/theft, motor vehicle theft, and arson.

In terms of absolute numbers, there has been a decline in juveniles arrested--36,683 in 1978 to 30,355, a decrease of 17.5 percent.

- The number of adults arrested for Part I and Part II crimes has increased by 20.2 percent in five years--from 77,357 in 1978 to 92,988 in 1982 (an additional 15,631 arrests).

- Within the category of Part I Index crimes, total arrests have increased 26.2 percent, but the proportion who are juveniles has been declining from approximately 50 percent in 1978 to 35 percent in 1982. The absolute number of adults arrested has increased 60.8 percent (16,296 to 26,170), while the number of juveniles arrested has decreased 9.7 percent (15,605 to 14,098).

Summary - Juvenile/Adult Arrest Rates (Table 10)

A summary of the 1982 arrest rates (computed per 1,000 juveniles or adults in the general population) is presented by general offense categories in Table 10.

As was observed in 1981, adults were arrested for violent offenses at a rate of over two times that of juveniles. Conversely, the property crime arrest rate for juveniles was approximately twice as high as for adults.

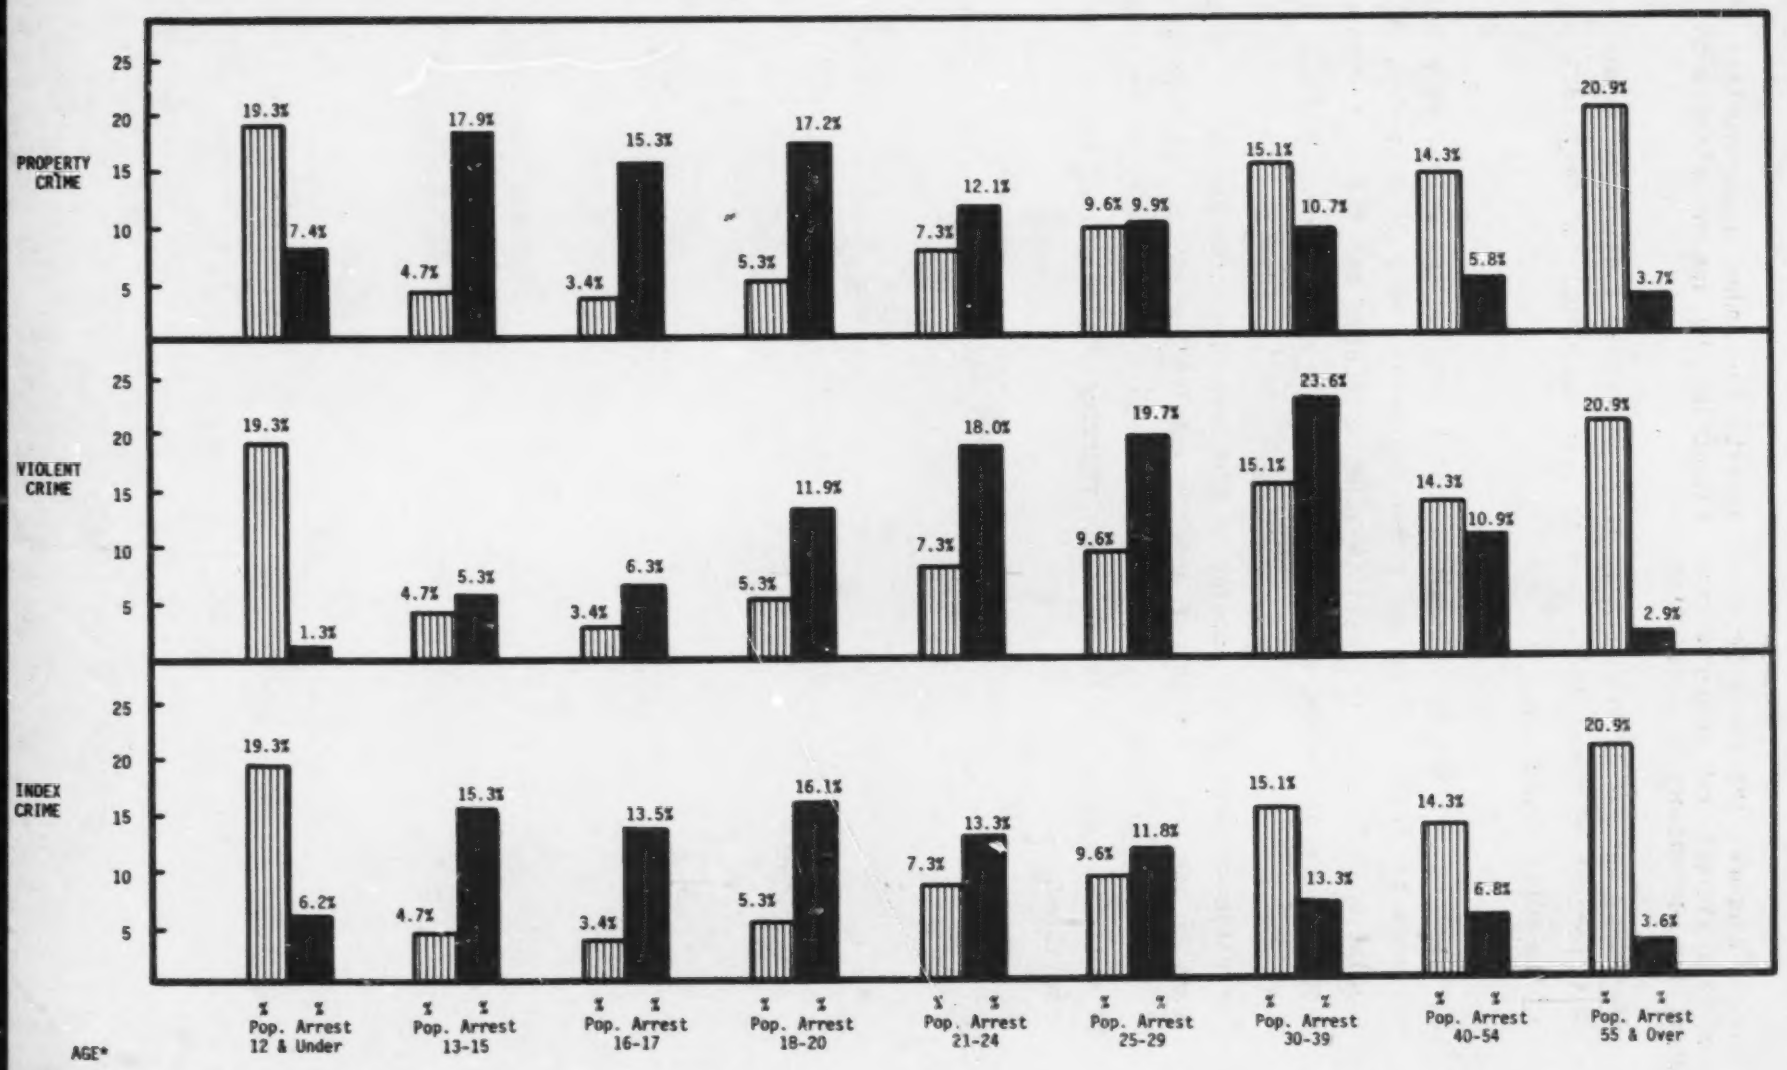
Figure 4 compares the percentages of arrests for Index crime--further broken down into violent and property crime categories--by age groupings with their respective percentages of population.

- As shown, the age groups from 13 to 20 comprised a disproportionately high 44.9 percent of total Index arrests, yet accounted for only 13.4 percent of the total population.

- 61.3 percent of the individuals arrested for violent crimes were between the ages of 21-39. This age group represents only 32.0 percent of the population. Persons in their twenties accounted for the most disproportionate share of violent crime arrests.

- The ratio of arrests to population for property crime peaked at 16 to 17 years of age (15.3 percent of arrests and 3.4 percent of the population). Of the total arrests for property crime, 50.4 percent were of individuals between the ages of 13 to 20--again representing only 13.4 percent of the population.



*Based on 1980 Census Data

MURDER

- 136 offenses of murder were reported in 1982--up 18.3 percent from 1981.

- The murder rate (5.1 per 100,000 population) was up from 4.3 in 1981.

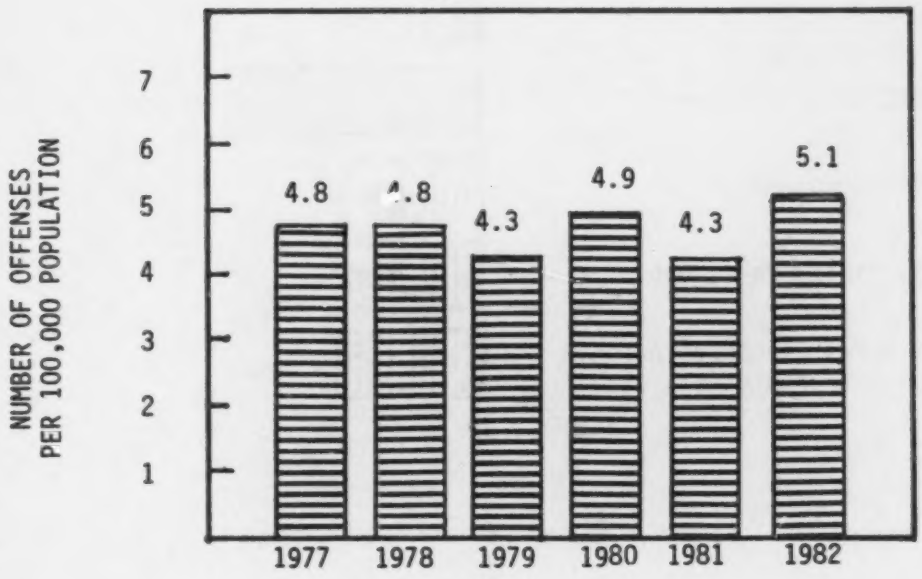

FIGURE 5 - MURDER RATES

Murder--Weapon (Figure 6)

The percentage of murders by type of weapon used is shown in Figure 6.

- Male victims accounted for 64.0 percent; females accounted for 36.0 percent.
- 83.1 percent were White; 11.0 percent were Negro; 2.9 percent were Indian; and 2.9 percent were Asian.

DRIVING UNDER THE INFLUENCE OF INTOXICANTS (DUII)

Due to the nature of the offense and the fact that an arrest is made at the time an offense is known, data regarding DUII is presented in the following arrest section.

- 27,370 arrests were made for DUII in 1982.
- The arrest rate was 1030.4 per 100,000 population, down 8.1 percent from 1981.
- DUII accounted for 7.9 percent of all crimes in Oregon and 16.0 percent of Part II crime.
- Arrests for DUII accounted for 22.2 percent of all arrests.

Of the 27,370 arrests, all were reported by age and sex.

- 1.7 percent were of juveniles and 98.3 percent were adults.
- 89.3 percent were male and 16.1 percent were female.

The arrests were reported by specific blood alcohol test levels at the time of arrest (Table 27). The largest percentage (38.7%) of persons tested recorded a level of .15 to .20. 28.2 percent had a recorded level of .20 or greater. The entire distribution, including those who refused the test, did not change notably from 1981 figures.

SECTION 2

OFFENSES, CLEARANCES AND ARRESTS BY DISTRICT, COUNTY, AND AGENCY

The agency statistics concerning Part I and II offenses contained in the following tables were reported to the Oregon UCR program by the individual participating agencies for 1982 and include totals for each administrative district and county including a total for the Oregon State Police in each county.

The following key is included as an explanation of the abbreviations used throughout the tables:

KEY TO FORMAT ABBREVIATIONS

Months of Reporting	The number of months reported by each individual agency.
Officer Assaults	The number of reported assaults on police officers during the reporting period.
OFF	The number of actual verified offenses or attempts as set forth by UCR guidelines and definitions.
ARR	The number of arrests made during the reporting period. (Includes any arrests made during this period for offenses reported prior to 1/1/82. Includes persons cited, summoned, and notified as well as those taken into physical custody.)
CLR	The number of offenses cleared by arrest or cleared exceptionally during the reporting period. (Includes any clearances made during this time for offenses reported prior to 1/1/82.) These are counts of offenses cleared, not persons arrested.

NOTE: When counting arrests, only those arrests which are made for an agency's "own" cases are counted for UCR purposes. For example, if Agency A makes an arrest on a warrant for Agency B, Agency B counts the arrest for UCR purposes. Agency A does <u>not</u> count it. For this reason, the number of arrests shown in this report will not necessarily agree with the statistics within a department which may show <u>all</u> arrest activity.

STATISTICAL METHODS

CALCULATION OF CRIME RATES

Quite often it is desired to compare the volume of crime occurrence, either totally or by individual offense, over a period of time for a selected group of agencies or jurisdictions. The geographical area being studied will undoubtedly consist of law enforcement agencies of various strengths and serving widely varying sizes of population. An agency equalizing factor must be developed, or in other terms, a common denominator is needed. To arrive at a valid comparison, the concept of rate is utilized.

The crime rate is defined as the number of offenses occurring per 100,000 population over the period of one year. The common denominator for any community, county, district, or state is obtained by dividing the population represented by 100,000. Once this denominator is determined, it becomes a relative constant until such time as the population of the community, county, district, or state changes appreciably. The crime rate can be calculated then by dividing the number of offenses by the denominator.

a. Population ÷ 100,000 = common denominator

b. Number of offenses ÷ common denominator = crime rate

Example:

Agency A serves a population of 50,000 and experienced a total of 2,500 Index offenses in 1981.

Index Crime Rate -

a. $\frac{50,000 \text{ (population)}}{100,000} = 0.50$ (common denominator)

b. $\frac{2,500 \text{ (number of offenses)}}{0.50 \text{ (common denominator)}} = 5,000$ (crime rate)

Therefore, the Index crime rate for Agency A in 1981 was 5,000 offenses per 100,000 population.

Example:

Agency B serves a population of 128,750 and experienced a total of 13,500 robbery offenses in 1981.

Robbery Rate -

a. $\frac{128,750}{100,000} = 1.2875$

b. $\frac{13,500}{1.2875} = 10,485$

The robbery rate for Agency B in 1981 was 10,485 offenses per 100,000 population.
